Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 22-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,645,074. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would be obvious to one of ordinary skill in the art to broaden or make the claims less verbose while claiming the same features.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3713

Claims 22-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fier US Patent 6,126,542 in view of Hamano US Patent 4,560,161. Fier discloses a bonus game that is started in response to an outcome of a primary game and that the primary game may be any type of well known game. The bonus game of Fier is disclosed in columns 7 and 8 as a matrix of symbols selected by the player in order to form a poker hand and compare the hand to a pay table in order to determine the bonus. Additionally Fier discloses at the bottom of column 8 that the field can be any number of selectable elements. Further, the selected hidden values need not be faces of playing cards. They may be numbers which must be matched or add-up to a certain number or graphical representations which must conform to the one or more predetermined secondary game winning outcomes. Fier lacks in disclosing revealing the outcomes associated with any unselected ones of the elements. In an analogous invention to Hamano a playing field with selectable card faces is presented. Column 3 discloses that after the hand is selected by the player that all of the card faces are revealed to display their patterns, and thereby the player can make sure of the contents of the aligned cards afterward. The references of Hamano and Fier are directed to the same game. One of ordinary skill in the art would be motivated to combine the references to have a matrix which reveals itself after the feature is over in order to give the player satisfaction since Fier discloses that the field can be changeable both in images and numbers.

Citation of Pertinent Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following documents Donovan '513, and WO97/27569, WO98/09259, and AU 9748484 are all related to selection games.
